

21st World Congress and Exhibition on

Vaccines, Vaccination & Immunization

November 09-10, 2017 Vienna, Austria

Allied Academies - UK

85 Great Portland St, Marylebone, London W1W 7LT, United Kingdom

Conference Day 1 | Thursday, November 09, 2017

Meeting Room 9

09:00-09:30

Registration Desk Opens

09:30-10:00

Opening Ceremony

KEYNOTE FORUM

10:00-10:05

Introduction

10:05-10:35

Title: A novel Lyme borreliosis vaccine protecting against all major borrelia infections
Andreas Meinke, Valneva Austria GmbH, Austria

10:35-11:05

Title: Targeted vaccination and intrinsic adjuvant function: Next generation checkpoint control
Geert C Mudde, OncoQR ML GmbH, Austria

GROUP PHOTO

NETWORKING & REFRESHMENT BREAK 11:05-11:25 @ Foyer

SPECIAL SESSION

Sessions: Novel Vaccines - Research and Development | Cancer Vaccines | Chikungunya vaccine | Vaccines Discovery, Development & Formulation | DNA vaccines

Session Chair: Andreas Meinke, Valneva Austria GmbH, Austria

Session Co-chair: Youness Cherradi, Merck Life Science, Belgium

Session Introduction

11:25-11:50

Title: Antigen-coupled immune cells serve as antigen-delivery carriers for cancer vaccine
Chang Qing Xia, University of Florida, USA

11:50-12:15

Title: Ethical issues in the production, design and clinical trials of new vaccines for emerging diseases in low income countries
Ida Cristina Gubert, Federal University of Parana, Brazil

12:15-12:40

Title: Measles vector vaccine platform as an effective tool to prevent chikungunya virus infection
Matthias Müllner, Themis Bioscience GmbH, Austria

LUNCH BREAK 12:40-13:30 @ Flemings Restaurant

13:30-13:55

Title: Universally protective vaccines: A revolution in modern vaccinology
Geert Vanden Bossche, German Center for Infection Research (DZIF), Germany

13:55-14:20

Title: Live-recombinant measles virus vaccine to prevent zika virus infection
Sabrina Schrauf, Themis Bioscience GmbH, Austria

14:20-14:45

Title: A novel mechanism linking memory stem cells with innate immunity in protection against HIV-1 infection
Thomas Lehner, Kings College London, UK

14:45-15:10

Title: Challenges and dilemmas about vaccines against Epstein Barr virus and the other herpesviruses
Emmanuel Drouet, University of Grenoble-Alpes, France

NETWORKING & REFRESHMENT BREAK 15:10-15:30 @ Foyer

15:30-15:55

Title: Development of a production and purification platform for virus like particles (VLP) and adenovirus vector vaccine candidates: Two case studies
Youness Cherradi, Merck Life Science, Process Solutions, Belgium

15:55-16:20

Title: Harnessing the immunogenicity of viral proteins for designing novel cancer DNA vaccines
Gaëlle Vandermeulen, Louvain Drug Research Institute - University of Louvain, Belgium

Conference Day 2 | Friday, November 10, 2017

Meeting Room 9

KEYNOTE FORUM

10:05-10:35

Title: Accelerating vaccine process development and manufacturing: Innovative approaches and challenges
Anissa Boumlic-Courtade, Merck Group, France

10:35-11:05

Title: Translational Vaccinology: A myth?
Geert Vanden Bossche, German Center for Infection Research (DZIF), Germany

NETWORKING & REFRESHMENT BREAK 11:05-11:25 @ Foyer

Sessions: Novel Vaccines - Development and production | Vaccines formulation

Session Chair: Andreas Meinke, Valneva Austria GmbH, Austria

Session Co-chair: Youness Cherradi, Merck Life Science, Belgium

Session Introduction

11:25-11:50

Title: A live attenuated nasal vaccine against pertussis
Camille Locht, Center for Infection and Immunity of Lille - Institut Pasteur de Lille, France

11:50-12:15

Title: Successfully activating positive behaviors of the stakeholders involved in vaccine purchasing and usage through technological advances
Pierre A Morgon, Virometix, Switzerland

Poster Presentation 12:15-12:45 @ Meeting Room 9

VAC001

Title: Ethical issues in the production, design and clinical trials of new vaccines for emerging diseases in low income countries
Ida Cristina Gubert, Federal University of Parana, Brazil

VAC002

Title: PATfix™ - At-line monitoring of impurities and critical quality attributes in biopharmaceutical up- and downstream processes using HPLC fingerprinting
Ingo Nagler, BIA Separations, Slovenia

VAC003

Title: Protection of horses from West Nile virus lineage 2 challenge following immunization with a whole, formalin-inactivated WNV lineage 1 vaccine
Anne Thomas, Zoetis, Zaventem, Belgium

VAC004

Title: Immunological evaluation of HCV core and its alternative reading frame protein vaccine prototypes
Irina Sominskaya, Latvian Biomedical Research and Study Center, Latvia

VAC005

Title: Downstream processing of gene therapy vectors and vaccines using monolithic columns
Ingo Nagler, BIA Separations, Slovenia

NETWORKING & LUNCH BREAK 12:45-13:30 @ Flemings Restaurant

PANEL DISCUSSION

Awards & Closing Ceremony
